Solar roofs
add value for local
communities

About us

Founded in 2010, GSE Intégration has been a subsidiary of the Terreal and wienerberger Group, the European leader in building envelopes.

Tailor-made solutions

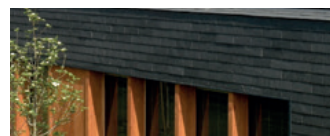

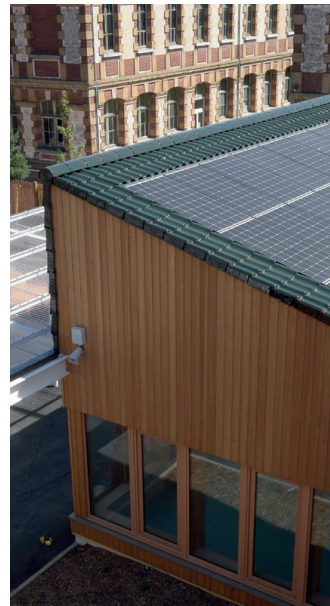

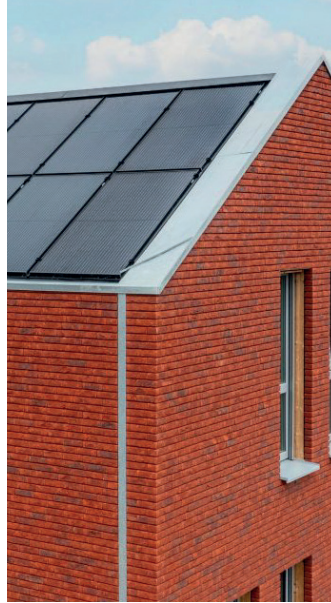

With our experience in the design and manufacture of mounting systems, **we can advise public authorities and help with the solarisation** of their structures.

Customised design

Thanks to **our in-house engineering department**, we can offer you a centralised solution for all your solarisation projects by providing qualified installation technicians, technical studies, plans, etc.

Solar roofs

GSE Intégration's roof systems for traditional photovoltaic panels

Cost-effective

Produce kWh of power thus reducing consumption costs of buildings.

Made in France

Reduce the carbon footprint of buildings by producing low-carbon energy.

Universal

Compatible with all types of sloped roofs (slate, tile, zinc).

Easy installation

They can be installed like traditional roofing elements, without any special equipment or tools.

Aesthetics

In accordance with the requirements of the public authorities.

Certifications

MCS Product Certification Certificate
by KIWA: KIWA00041
