

**Designed with over 20 years  
of solar experience -  
Made by solar professionals,  
for solar professionals.**

**BirdBlocker is fast, easy and reliable.  
A complete system engineered for minimal  
installation effort, optimal compatibility  
and maximized protection.**

**BirdBlocker is a solution, tested by the elements, proven in  
the real world - from the arctic colds of Scandinavia to the  
scorching heat of Spain, BirdBlocker keeps your system safe.**

**Birds nesting under your solar panels, is definitely something you want to avoid. BirdBlocker prevents damages to panels, broken cables or connectors, fire hazards and efficiency loss.**

**The flexible design of BirdBlocker flows over every curvature - a impenetrable, fully enclosed barrier optimally protects your solar installation from nesting birds.**

**BirdBlocker is made from a unique 100% recyclable, UV-resistant, frost- and heatproof material ensuring efficient, worry-free protection for decades.**

Installing BirdBlocker is a cost-efficient, sustainable contribution to biosafety as well as a reduction of fire hazards in agriculture.
